

Product Review

Whether you are on your feet all day attending to patients or running endlessly from meeting to meeting, your feet probably need some TLC. These oncology nurses checked out four nursing shoes and gave us the scoop.

▶ Both Skechers Soft Stride Polly and Oswald Clara are stylish, comfortable, and are perfect for being on your feet all day. The Oswald is slip resistant, but could use improvement with arch support. Tightness in the toe area buys the Soft Stride Polly a thumbs down.

▶ The Skechers Oswald Clara is trendy, lightweight, cushy and affordable. It scores an "E" for Excellent! On the other hand, the Skechers Soft Stride Polly did not rake in points except for in category of style. It is heavy, hot, costly, and difficult to wear with socks.

▶ Both Soft Stride Polly and the Oswald Clara receive equal superior praise in style, simplicity, comfort, slip protection and price.

▶ Skechers Oswald Clara does it again and snags the gold in all categories; style, cost and comfort. Unfortunately, their Soft Stride Polly does not fare as well. They are too plain and not well fitted for comfort.

▶ The Airwalk Complete Clog is comparable in style, affordability, soil resistance and wearability. Despite the lack of arch support and slip resistance, overall rating for this product is fair.

▶ The Airwalk Complete is reasonable in cost and feels great on the foot. Their area of weakness though is in selection of color. Overall, this shoe scored mediocre.

▶ The Airwalk Complete Clog is basic in look and not too bulky for comfort. In general, the shoe is nice but too wide, therefore, giving it an average rating.

▶ The Airwalk Complete loses points in all categories with the exception of price. They lack comfort, have little cushion for the sole and are very plain in style.

▶ The Crocs Cayman Sandal is affordable and stylish and commonly used in most medical professions. This shoe scores an average rating.

▶ The Crocs Cayman Sandal is in fashion, inexpensive and cozy. Aside from the bothersome sling back, this shoe gets an enthusiastic seal of approval.

▶ The Crocs Cayman Sandal gets a plus in basic design, cost and comfort. These shoes tend to lack breathability but can be removed with ease for cooling.

▶ The Crocs Cayman Sandal is very chic, moderate in price and overall, a great product. The lack of breathability is the only weakness this shoe possesses, therefore, this shoe gets a solid B+.

Oswald Clara(right) and Soft Stride Polly(left)
SKECHERS USA, Inc.
